Declaration - MIF for HAC RF Interference Evaluation

To whom it may concern:

This device, with FCC ID: 2AE4519NOIT21, Hearing Aid Compatibility Requirement is going to be certified under ANSI C63.19 2011 version per Part 20.19.

The M rating was determined by measuring the maximum steady state average E-field values in dB (V/m) or average antenna input power as documented in HAC test report exhibit, and adding the MIF value in dB. The MIF values below for the worst-case operation mode for all air interfaces are pre-determined values provided by SATIMO

UID	Communication System Name	MIF(dB)
10021	GSM-FDD(TDMA,GMSK)	3.63
10011	UMTS-FDD(WCDMA)	-27.23

We are confirming that the SATIMO simulation provided represents all the air interface modes applicable for a HAC rating for this handset.

Sincerely,

Herschel Crowe
